

Great Falls Tool Bus Member Agreement, Version 1

By completing activation, I become a Great Falls Tool Bus member and agree to this version of the Member Agreement.

1. I confirm that I am at least 18 years old, that the contact information I gave is accurate, and that I control the verified external email address on my application.
2. My membership is one account tied to one controlled Great Falls Tool Bus identity. On activation, the Tool Bus provisions my selected `@latoolb.us` mailbox, subscribes me to `discuss@latoolb.us`, and uses that same identity for the discussion archive. I may choose not to use the mailbox, but it is still provisioned. The `discuss@` archive is public. Access to `keyholders@latoolb.us` is separate and role-controlled.
3. The Tool Bus asks members to make a recurring contribution when they can. A \$0 choice remains valid. Paying, not paying, a failed payment, or a refund never grants, denies, pauses, resumes, or ends membership. Applying, activating membership, borrowing, returning, loss, damage, payment failure, or a refund never starts a charge. Any amount I explore during application or onboarding stays only in my browser; no contribution or payment state is created until I am Active and confirm the choice again. If I expressly authorize a recurring contribution, that recurrence continues until I cancel it through the provided controls.
4. When tool lending opens, I will follow checkout and return steps, the due date, and the recorded destination. Checkout and return require the condition checklist and overview photo. I will report damage, missing contents, or problems. The Tool Bus does not automatically charge me for loss or damage.
5. Sharing a one-time GPS observation is optional, separately requested, and never background tracking. The Tool Bus strips location and other embedded metadata from uploaded photos.
6. Pausing membership removes borrowing permission but does not create a payment consequence. Leaving or being removed ends login and borrowing access immediately. Through day 30, a keyholder may restore the same account after identity verification and an audit record. After day 30 I must apply again. Personal account data is purged at day 90, except records kept for finance, audit, an open obligation, or a legal hold. Inactive pre-tour applications close no earlier than 60 days without applicant activity. Warnings target days 45 and 55. Closure requires two recorded actual warning attempts in the current inactivity period, at least 10 days between those attempts, and at least 5 days after the second. Delayed warnings extend closure beyond day 60. Declined, withdrawn, or expired applicant personal data is deleted after the 30-day window following actual closure.
7. The activation page shows this agreement's exact version. My activation receipt records the version I accepted. A later agreement version applies to future activations unless a later reviewed rule says otherwise.

No separate liability waiver is part of Version 1. The Tool Bus will say when each service is available.
